

BILL VALIDATION

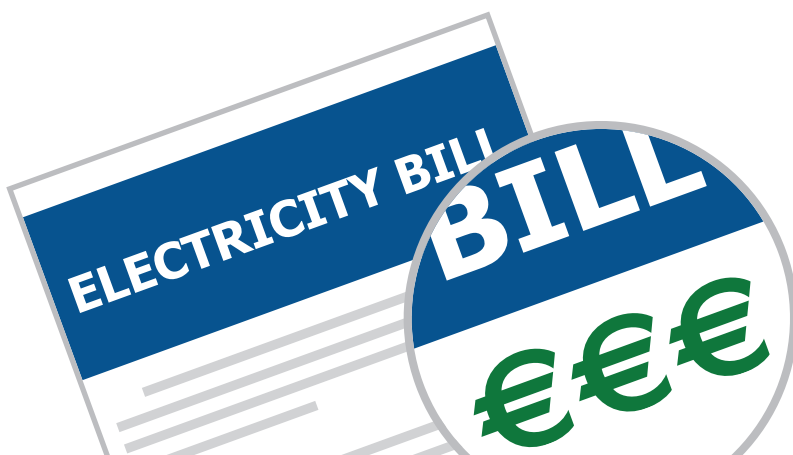

It is crucial for large energy users to audit and validate their energy bills constantly in order to ensure that they are only paying for energy they have used.

Digren Energy check energy bills against actual consumption and correct any errors encountered as quickly as possible. Bill validation is not just simply checking the rates. It does include verification of contractual rates but also verifies all pass through charges and calculations.

Digren Energy bill validation services include:

- Calculation of charges and finance reporting
- Use of actual data to drive site charges / accruals
- Preparation of utility budgets and forecasts
- Variance reporting and analysis
